

Clockwork Solutions Continues Work at GEAE

Corpus Christi, TX – Dec. 15, 2004

General Electric Aircraft Engines (GEAE) has contracted Clockwork Solutions, Inc. to apply the Aircraft Total Life-cycle Assessment Software Tool (ATLAST) to the ongoing depot management activities at Corpus Christi Army Depot (CCAD). Clockwork is proud of the work that has been completed providing services and supplies in support of Army Aviation Fleet Management, and looks forward to continuing this work in the future. This project is in support of the CCAD goal of reducing depot overhaul Turn Around Time (TAT), and improving engine Time on Wing (TOW).

Clockwork strives to expand the functional capabilities of ATLAST to better serve aviation fleet management and performance based logistics requirements. Improvements include new data interface utilities, simulation reports and analysis graphs. Clockwork has also developed source data, and data mining tools to evaluate engine Time on Wing (TOW), Removal Causes, Component Age Distributions, and numerous other metrics of interest.

About Clockwork Solutions (www.clockwork-solutions.com)

Clockwork Solutions is a leading services and applications provider of Asset Management Solutions over the entire life cycle of complex systems and their logistical and operating environments. Clockwork delivers powerful and unique systems engineering and predictive modeling solutions for DoD & Defense Supply Chain, Process, Energy, and Other Industries. These solutions help decision makers meet business objectives on performance, costs, and spare parts inventories of complex systems.

Clockwork's success is based on our powerful, proprietary SPAR™ technology and methodology, developed over the past twenty years and successfully utilized by leading global organizations.

Clockwork has the expertise, experience, and technology to assist clients with challenging issues such as how to:

- Reduce life cycle costs.
- Manage the effects of aging on system performance.
- Implement logistics processes to reach targeted performance
- Optimize spare parts distribution and availability.
- Determine the most cost-effective use of preventative maintenance and scheduled downtime.

Clockwork's clientele consists of world-class industry leaders who have realized over \$3B in additional value using Clockwork's SPAR™ technology.
