

Clockwork Solutions Held a Successful Exhibit at the Performance Based Logistics Event

*Georgetown University,
Washington, D.C.*

Clockwork Solutions held a very successful exhibit and speaking session at the IDGA Performance Based Logistics (PBL) 2006 conference.

Industry leaders looking for avenues to establish and maintain PBL in their organizations were interested to learn how Clockwork Solutions modeling technology and products can enable them to track and manage risks associated with budgets and mandatory system performance. Sean Connors, President of Clockwork Solutions, held an informative and productive session on “Business Case Analysis: Reducing Uncertainty in Life Cycle Performance Forecasting”. The session proved to be valuable to the industry participants, providing insight into the systematic engineering analysis that is required to forecast key life cycle supportability events and contractor/government responsiveness.

About Clockwork Solutions

Clockwork Solutions develops and markets advanced performance based modeling and simulation products and provides modeling support and consulting services. Clockwork is proud of the work it is doing across the defense services to improve supportability of systems through performance based modeling and forecasting. Clockwork Solutions’ proprietary modeling technology, SPAR™, uses unique Monte Carlo algorithms to build comprehensive, reliability-based predictive models of complex assets and their operational and logistical environments, such as a fleet of aircrafts, missile systems, a power plant and its distribution system, a group of chemical plants, etc. Clockwork Solutions’ customers include the US Army, Lockheed Martin, Raytheon, EADS Astrium, the Israeli Defense Forces, GE, Chevron, Conoco Philips, and many others. Clockwork Solutions, Inc. is headquartered in Austin, TX, with an R&D center and International operation headquarters in Israel. Clockwork Solutions is owned by the Formula Group (NASDAQ: FORTY).
